

# The next dimension of machine control:

## Simple, clear, perfect.

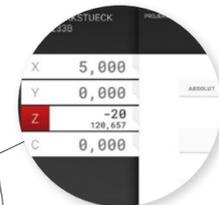

**3D VISUALISATION OF THE COORDINATE SYSTEMS**

- ▶ Direct overview of changed / activated pallets, workpieces and electrodes.
- ▶ Quick access to associated offsets.

**OPERATING FLOW IN SIGHT**

- ▶ The operation of the interface, including the management of parts, positioning, measuring, programming and the actual eroding process, follows natural processes (intuitive user guidance).
- ▶ Quick change within the applications via icons.

**EASIER ORIENTATION VIA AXIS REPRESENTATION**

- ▶ A combination of the actual and nominal value for each axis provides you with a quick overview of where the machine is at the moment and which position is approached next.
- ▶ In this way, positioning becomes easier and more intuitive.

**QUICKLY POSITIONED: WITH INCREMENTAL AND ABSOLUTE VALUES**

- ▶ A clear identification for the entry via corresponding buttons in combination with a colour coding facilitates the distinction between absolute and incremental values for positioning.

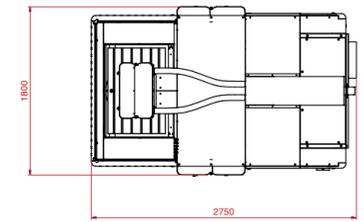

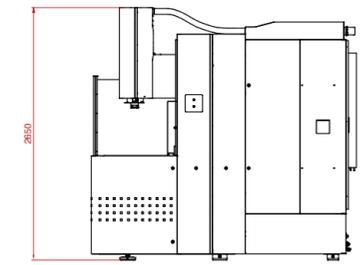

**DIRECT ACCESS TO PROJECTS AND JOBS**

- ▶ With one click to the project and job management
- ▶ Intelligent search: Name and / or planned date as well as directly for specific entries.

## Data box

Machine data	genius 900 NOVA
Height	2650 mm
Width	1800 mm
Depth	2750 mm
Total weight (w/o fluids)	ca. 7000 kg
Table: Length x width	900 x 600 mm
Dielectric fluid above table	450 mm
Dielectric filter	1 central filter
Workpiece weight	1000 kg
T-slots: number / width / distance	6 slots / 10 mm / 100 mm
Distance: Table - sleeve w/o chuck max. / min.	550 / 200 mm
Travel distance X - Y	720 x 420 mm
Travel distance Z	350 mm
Resolution X - Y - Z	0,001 mm
Rapid travers rate X - Y	20 m / min
Rapid travers rate Z	20 m / min
Electrode weight	max. 100 kg
Dielectric fluid consumption	560 litres
Number of adjustable feet	3 pcs. + 2 columns
Weight per foot	ca. 2,9 t
Required cooling power	4,5 kW
Floor load	ca. 1,8 N/mm <sup>2</sup>
Space of base plate	1x Ø150 mm. 2x 146 x 146 mm
Flow rate (air)	10l / min
Required air pressure	min. 6 bar

Generator data	genius 900 NOVA
Control system generator	genius magic <sup>3</sup> (integr.)
Operating current	52 A in total optional 100 A in total (+ 48 A) Booster 196 A in total (+ 96 A)
Suction capacity	6 KVA / 400 V / 50 Hz
Handling	Stand alone operator panel with keypad, mouse and genius NOVA handheld terminal
Screen	22" Touchscreen
Screen	IPC Intel Windows 10
Control system machine	own RISC-CPU with 1.2 GHz and 64 Bit own RISC-CPU with 1.0 GHz and 64 Bit
Gap monitoring	
Engine control	Digital controller for AC-servomotors
Interface	LAN-TCP/Internet protocol, USB, RS 232

**NEW!**

**genius 900 NOVA**  
 The next dimension of eroding

# genius 900 NOVA

## Eroding in a new dimension

With the *genius* 900 NOVA, you can explore an entirely new eroding terrain. And that in every respect: No matter whether speed, accuracy / precision, stability or flexibility. The *genius* 900 NOVA can justifiably be referred to as the best of its class.

The compact substructure made of mineral casting ensures steady work results, even in case of temperature fluctuations in the environment.

### Faster, more precise, *genius* 900 NOVA.

The fundamentally new developed machine leaves nothing to be desired: High speeds in all axes.

At the same time, low-wear erosion with copper or graphite as well as steady process runtimes are ensured.

The *genius* 900 NOVA impresses each user with stunning precision, speed and flexibility.

### The features at a glance:

- Simultaneous 8 axes operation
- Manual eroding for teaching electric discharge machining via manual control with joystick function
- LCD display and Windows 10 touch monitor
- High vibration dampening due to mineral casting
- Movable tank (without dielectric emptying)
- Acceleration 1G 10 m/sec<sup>2</sup>
- Highest erosion performance and precision for all material pairs
- Wear-free final dimension tuning
- Thermo-symmetric mineral cast construction
- Fully enclosed integrated measuring systems
- Integrated electro cabinet cooling (standard)
- Fully temperature-controlled machine frame (optional)
- LED status display (optional)
- Fully integrated workspace lighting (optional)
- Freely programmable flushing (optional)
- Automatic central lubrication (optional)

Integrated workplace lighting

Loading by crane possible

Display for active process monitoring

Integrated electro cabinet cooling

Machine control

- ▶ Control via touch screen
- ▶ Fully integrated job manager possible
- ▶ Direct import of CAM data for program creation (no manual programming necessary; optional)

Digital handwheel

- ▶ For manual target positioning

LCD display

- ▶ Indicates machine status, current axis position

Keyboard

- ▶ Open electrode chuck
- ▶ Axial direction for automatic positioning

Control panel electrically height-adjustable

Thermo-symmetric mineral cast construction

## New handheld terminal *genius* NOVA

- ▶ Ergonomically shaped
- ▶ Two approval buttons for left- and right-handers
- ▶ Large LCD display
- ▶ Digital handwheel for manual target positioning (optional in combination with *genius*<sup>transfer</sup>)
- ▶ Connection cable of individual length (standard 8 m)
- ▶ Fully integrated 4 axes joystick control
